

SMALL GROUP SORTING EXERCISE WORKSHEET – Industrial: Audience Table

ID	Policy Option	Recommended Bin	Suggested Contact/Source for Additional Information
RCI-60	Promotion and Tax or Other Incentives (e.g. Energy Star, credits for solar hot water)	D	<ul style="list-style-type: none"> - Too broad - Needs to be broken out into more specific strategies - Example: Energy efficiency funds (connection public benefit fund) - Carbon tax, rebates, tax credits; education and outreach should be separate
RCI-61	Improvements in industrial lighting	A (D, needs more specific about how implemented)	<ul style="list-style-type: none"> - Is this a mandate? Financial incentives? - Difficult to qualify for financial incentives; assisting to bring EE to U.S.
RCI-62	Bulk Purchasing Programs	C	- Not workable/appropriate for industrial sector
RCI-63	Utility/DSM Programs	A/B	<ul style="list-style-type: none"> - Once industries get started with easy, high ROI program they get forward traction. - To move this further than it already is will require investment; where is this coming from? - Public funds? Rate charges?
RCI-64	Market transformation and technology development programs, industry coalitions	B (D, needs better definition)	<ul style="list-style-type: none"> - This includes 2 separate programs: 1) market transformation, 2) tech development and R and D - need to be separated/better defined - EPRI is a more appropriate example - EEI is a more appropriate example - Utah Industries forming coalition
RCI-65	Focus on specific end-uses: motors, pump systems, boilers, steam system upgrades, process-specific equipment.	A/D	<ul style="list-style-type: none"> - No brainer in terms of energy/carbon savings, but what's the mechanism? - Need more info on implementation or mechanism - Relates to DSM
RCI-66	Focus on Small and Medium Enterprises (SMEs)	A	<ul style="list-style-type: none"> - Part of broader DSM - The little guys often have bad equipment/little to invest
RCI-67	Promotion and Incentives for Improved Design and Construction (e.g. LEED, green buildings, expedited permitting) Shouldn't be LEED in industrial	B	
RCI-68	Support for switching to less carbon-intensive fuels (coal and oil to natural gas or biomass)	B/D	<ul style="list-style-type: none"> - More info needed - Industrial operations

ID	Policy Option	Recommended Bin	Suggested Contact/Source for Additional Information
RCI-69	Improved Building Codes, Training and Enforcement	C	- Doesn't belong in industrial
RCI-70	Energy Management Training / Training of Building Operators	C	- Should be reworked for industrial - Example: required licensing for boiler operation - Recommended move to commercial
RCI-82	Process Changes/ Optimization	B/D	- Need to be redefined to meet large industrial EE projects like steam optimization, etc. - Needs more detail; what's the mechanism
RCI-83	Leak Reduction /Capture, Recovery and Recycling of Process Gases	A/D	Needs to describe mechanism
